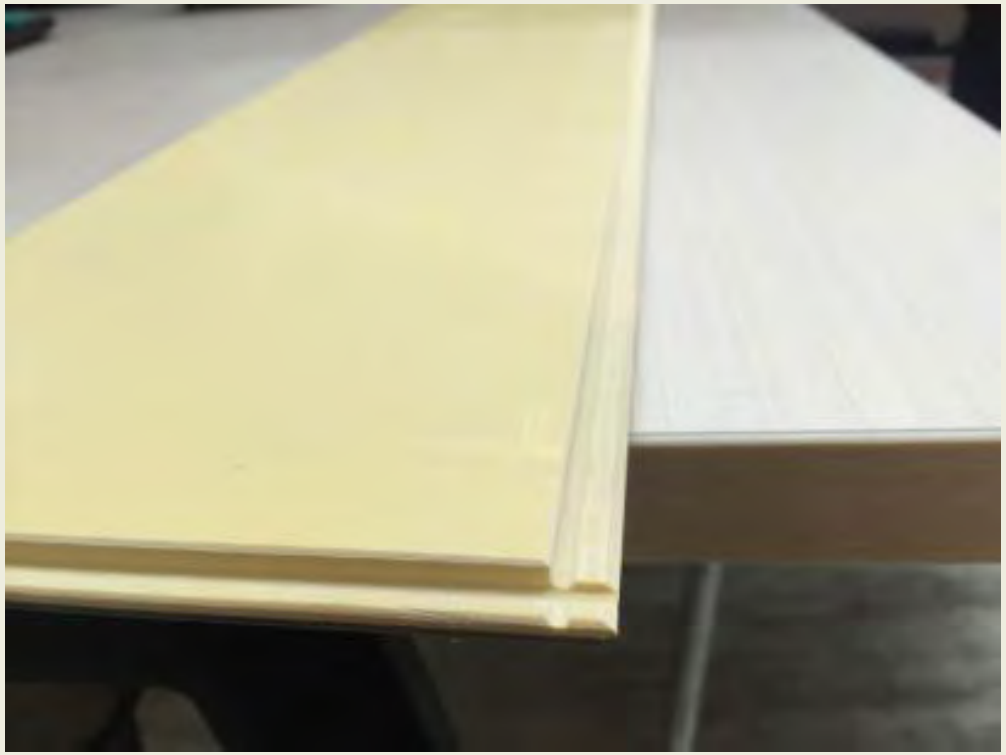
Advantages of VCP

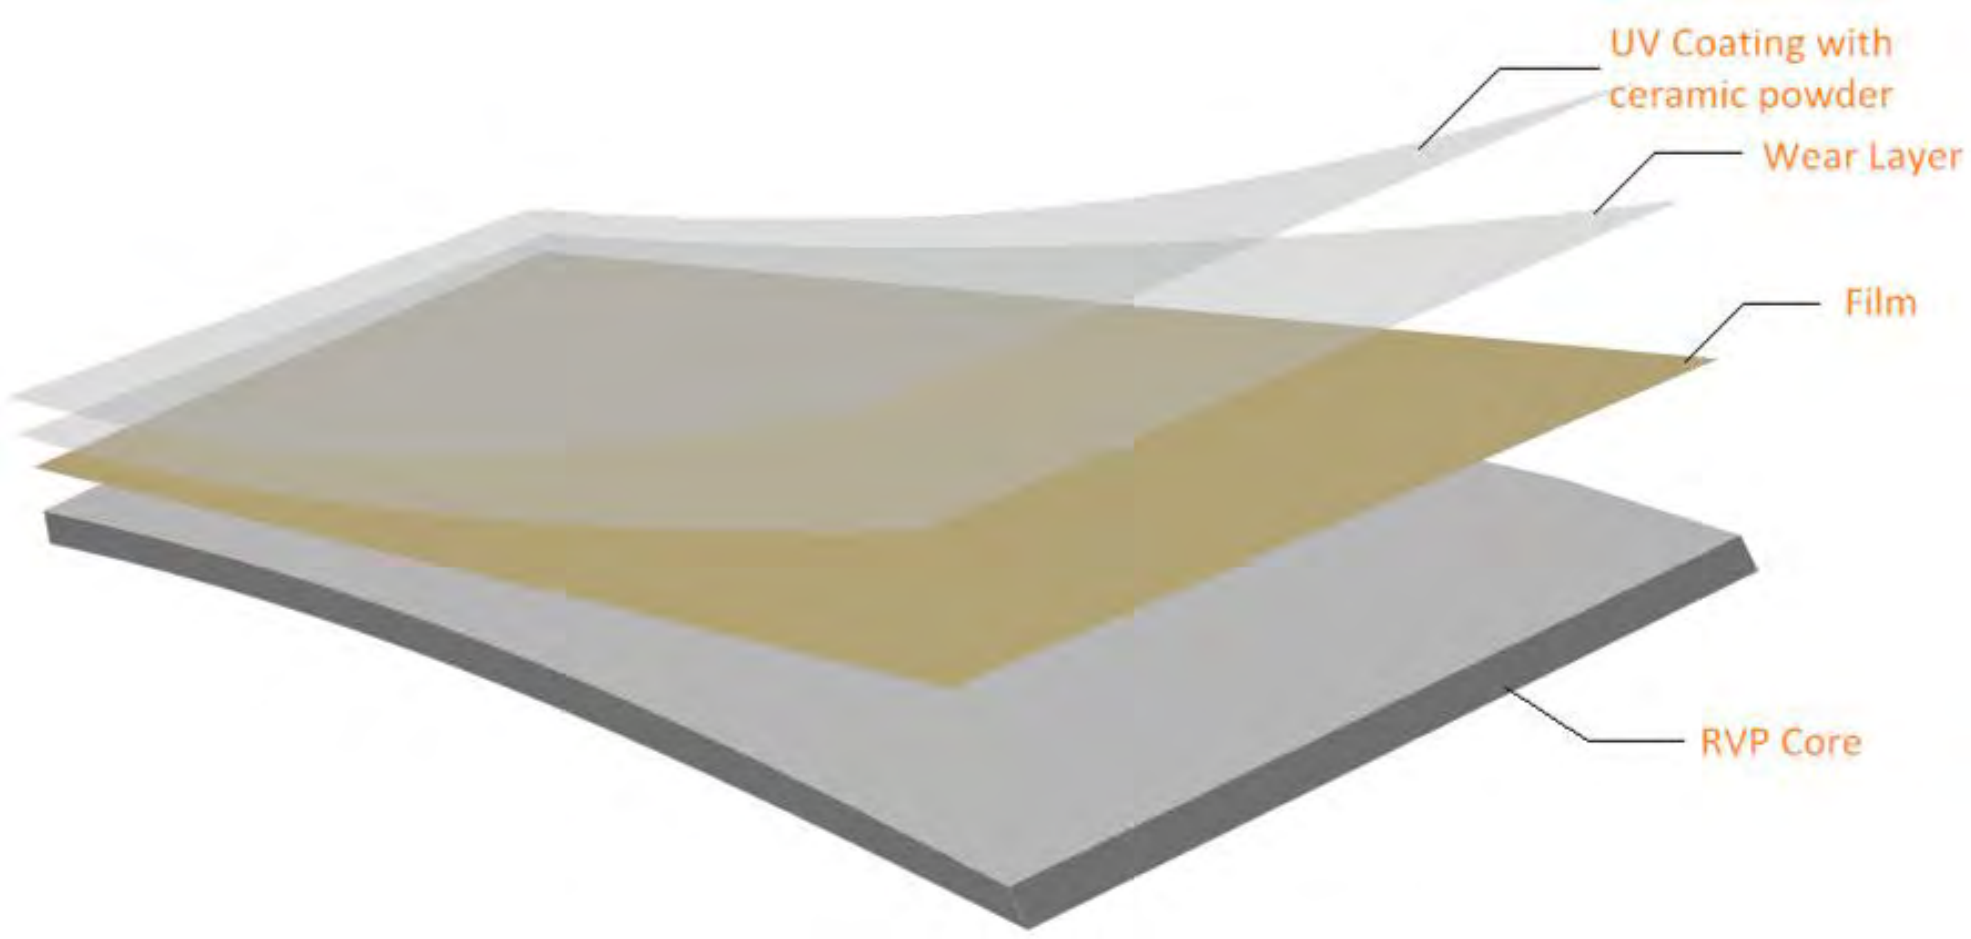


1. 100% waterproof
2. Easy locking system
3. Anti-mildew
4. Better Block Sound transmission
5. No Formaldehyde
6. Recyclable
7. Painted bevel technology makes VCP flooring look like real wood floors.

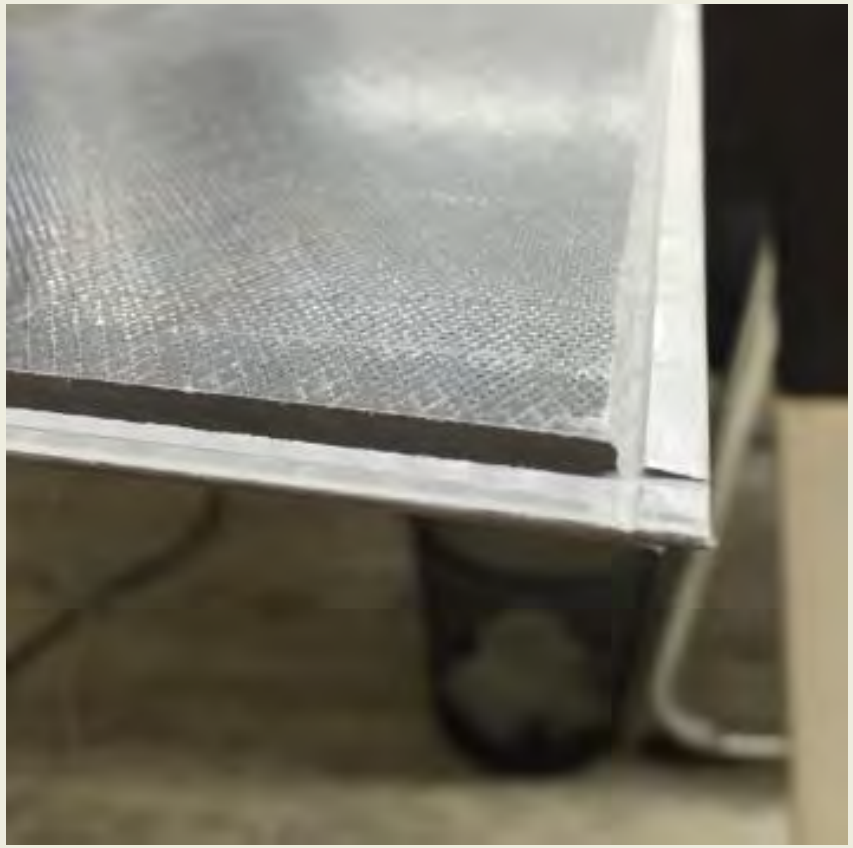
On the back, we can stick EVA or IXPE,as underlayment

My choice, my love——KENTIER

RVP (Rigid Vinyl Plank)



My choice, my love——KENTIER



Advantages:

1.Shrinkage small.
2. Stronger hardness, it is less affected by uneven ground.
3.High density.
4.Better heat resistance.
5.Waterproof, fire-retardant, anti-skidding, anti-mildew and anti-microbial
6.Can be installed in a large area.

My choice, my love——KENTIER

V-groove

Advantages:

1.No dimensional tolerance.
2.After installation, the paving effect will be more stereoscopic .
3.No scratch from sharp edge.
4. Painted bevel technology makes it look like real wood floors.

Design capability

KENTIER develops new product for each Spring and Autumn.

To keep developing, we had a design team, to design a couple of hardwood floors ,Tiles and keep the same design step with Europe and North America.

Then we copy the hardwood and Tile looking into PVC&VCP film and laminate papers,these papers are all Kentier exclusive papers.

Normally we have around 20 exclusive designs yearly, so that will cover more than 100 colors to help clients' market sales.

KENTIER

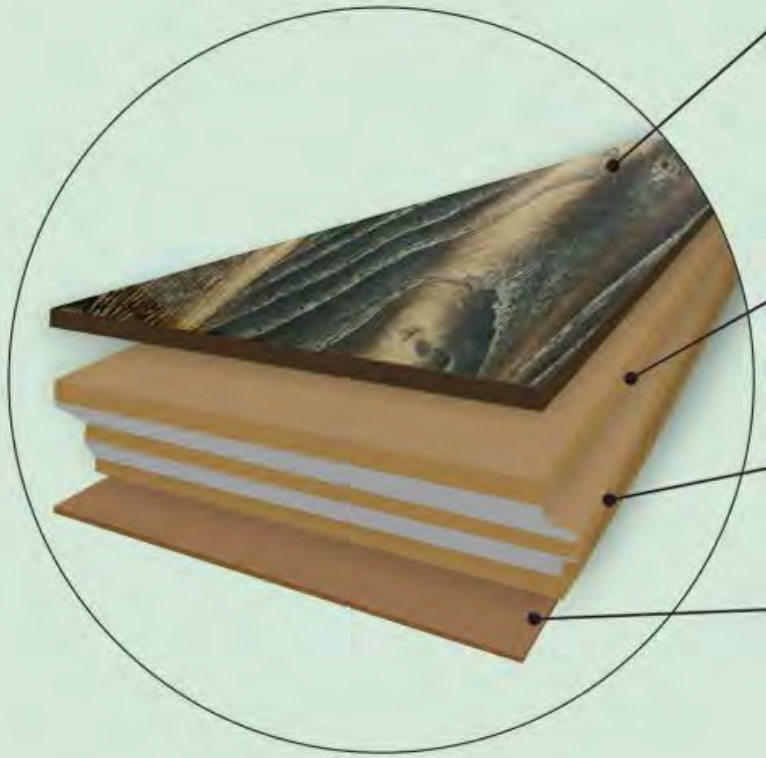
Engineered Flooring



Hardwood Top Layer

This layer is made of solid wood and gives you the look and feel of a real solid wood floor, This top layer has a finish which can range between oil or lacqueer

Softwood

The core area helps the flooring retain its shape and stability.A variety of materials such as plywood,softwood can be used for the mid core section.

T&G

Click

Supporting Layer

This layer is key to providing stability to the board,giving a strong foundation for the flooring
